Profile

Entry Level Full Stack Developer with strong foundation in [frontend technologies] and [backend languages]. Passionate about building scalable web applications using the **MERN stack** (MongoDB, Express, React, Node.js). With a strong foundation in both front-end and back-end development, I enjoy creating intuitive user interfaces and powerful, efficient back-end systems.

Skills

Frontend Development:

HTML, CSS, JavaScript, React.js, Bootstrap

Backend Development:

Node.js, Express.js, RESTful APIs, JWT

Database:

MongoDB

Version Control: Git, GitHub

Tools & Libraries:

Postman, NPM

Additional Skills:

Java, DSA using Java

India

12th Grade
Don Bosco Convent School Jhanjharpur Madhubani Bihar

2018 – 2019
India

10th Grade
Devasthali Vidyapeeth Chilkahar Ballia UP

Projects

Clone of Amazon - E-commerce Website :

Developing a clone of Amazon's e-commerce platform, where users can browse a wide range of products, add items to their cart, and proceed to checkout.

Student Management System

Developed a comprehensive system for managing student records, where users can **add, update, and delete** student details.

The system allows easy management of student data, including personal information, academic records, and other relevant details.

Certificates

- Certification in Data Visualization using Tableau
- Participating in Flipkart GRIP 6.0 - Software Development
